Indication
ORIMEV is indicated for the management of mild to moderate pain, the management of moderate to severe pain with adjunctive opioid analgesics, and the reduction of fever.

Important Safety Information
ORIMEV is contraindicated in patients with severe hepatic impairment, severe acute liver disease or with known hypersensitivity to acetaminophen or to any of the excipients in the formulation. Acetaminophen should be used with caution in patients with the following conditions: hepatic impairment or active hepatic disease, alcoholism, chronic malnutrition, severe hypotension, or severe renal impairment. Do not exceed the maximum recommended daily dose of acetaminophen. Administration of acetaminophen by any route in doses higher than recommended may result in hepatic injury, including the risk of severe hepatotoxicity and death.

ORIMEV should be administered only as a 15-minute intravenous infusion. Discontinue ORIMEV immediately if symptoms associated with allergy or hypersensitivity occur. Do not use in patients with acetaminophen allergy.

The most common adverse reactions in patients treated with ORIMEV were nausea, vomiting, headache, and insomnia in adult patients and nausea, vomiting, constipation, pruritus, agitation, and atelectasis in pediatric patients.

The antipyretic effects of ORIMEV may mask fever in patients treated for post-surgical pain.

Please see Brief Summary of Prescribing Information on adjacent page or full Prescribing Information at ORIMEV.com.

The standard scrub area is not equipped to handle the needs of a busy staff.

With various mask styles, scrub brush types, PPE and other single use items at each sink, as well as dozen of surgeons, techs, and nurses moving in and out throughout the day, your sink may end up a mess.

With Gander:

Store 3 times as much product in each area, reducing the need for constant restocking

Protect your items from unnecessary waste from and from contamination.

Conform to JCAHO standards, and above all, keep your Scrub Sinks looking professional.
